

Sevco Security Asset Intelligence Platform

Maximize your value. Minimize your risk.

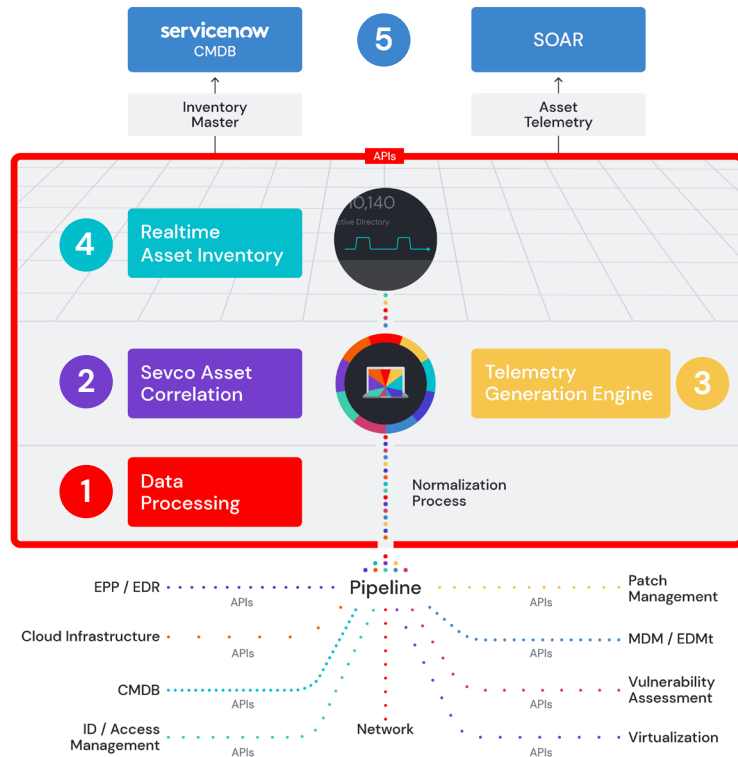

Sevco is a cloud-native asset intelligence platform that delivers converged asset inventory, enabling Service Providers to maximize your value and minimize your risk.

Key Features

- Continuous monitoring
- Fully multi-tenant
- Self-service
- Cloud-native
- Nothing to install
- Deploys in minutes

While organizations often own the right tools to secure their businesses, they have little insight into how these investments are deployed across their environments. This lack of visibility upends the foundation of every major security framework and presents a challenge to security teams: they can't protect what they can't see.

Sevco is a cloud-native asset intelligence platform that delivers converged asset inventory and generates real-time asset telemetry, then publishes both for use by other IT systems. Sevco makes sense of the data your customers already have, making your existing products and procedures more effective – with little or no change to them.

- 1 Data Collection:** Sevco integrates with your existing systems via native APIs to pull their specific view of asset information.
- 2 Correlation Analysis Engine:** Sevco identifies key attributes from source systems to join disparate inventory reports.
- 3 Telemetry Generation:** Sevco monitors asset state and generates asset and attribute change events.
- 4 Dashboard / User Interface:** Sevco displays converged inventory via an interactive Venn Diagram to uniquely shows “well managed” assets as well as assets in various states of partial configuration.
- 5 Publication:** Sevco’s data is fed into existing tools to drive and support existing processes and procedures.

How Sevco Maximizes Your Value and Minimizes Your Risk

Sevco is a cloud native asset intelligence platform that continuously monitors your clients' environments, providing normalized, correlated telemetry of your clients' cyber asset inventories.

Decreased breach risk

- Ensure controls are deployed as expected
- Identify unknown devices
- Identify and monitor most valuable assets
- Reduce re-infection through control deployment

No unexpected liability

- Validate service levels for all client assets
- Provide cyber insurance readiness for maximizing premium discounts
- Assist in preventing "failure to follow" or negligence claim denials

Higher operational efficiency

- Establish a single source of truth for assets
- Enrich existing SOC workflows
- Automate client deployment
- Eliminate guesswork and processes of asset correlation
- Automate client billing

Increased revenue & profit

- Expect 15–20% increased in customer revenue; often significantly higher – and the platform pays for itself
- Provide additional services
- Accurate billing

Deploy across your customer base for **your** needs, upsell to customers to recoup the expense.

A Frictionless Partner Experience

Sevco Platform was built with Service Providers in mind. We believe in the value of a partnership and mutual success. We strive to provide a partner program that has little to no overhead, the ability to scale up and down within your managed footprint: a frictionless experience and integration into your existing business models and operations.

Program Highlights

- No program or platform fees
- No client minimum
- Consumption-based billing
- Volume discounting
- 30-day trial for all your clients

Operational Highlights

- Multi-tenancy support
- Self-service provisioning
- Automated client onboarding
 - Deploy to hundreds of clients in minutes
- Minimal product training required
- Integrate seamlessly into existing stack

About Sevco Security

Sevco exists to fix a decades-old problem: attackers know the networks they target better than the companies that own them. Sevco is a cloud-native asset intelligence platform that delivers converged asset inventory and generates real-time asset telemetry, then publishes both for use by other IT systems. Sevco makes sense of the data our customers already have, making their existing products and procedures more effective. Founded in 2020, Sevco is based in Austin, Texas.
