Comprehensive Asset Intelligence and Vulnerability Prioritization

"With this evolution of the Sevco platform, you are empowering ops teams to gain visibility and insights into their exposure across the organization which empowers ops teams to action efficiently and effectively versus spending their time combing through reams of data and reports. Actionable Insights is my favored acronym for AI and is what Solutions II has built our entire ASM Illuminate solution around using Sevco as the underlying foundation for our offering."

**Jason Norred**
CISO
Solutions II

Key Features

- Continuous monitoring
- Fully multi-tenant
- Self-service
- Cloud-native
- Nothing to install
- Deploys in minutes

A complete and trusted asset inventory is fundamental for full-cycle vulnerability management

Built on the foundation of a complete asset inventory, Sevco's platform identifies exposures, including software vulnerabilities like CVEs and environmental vulnerabilities like missing security tools and IT hygiene issues. Sevco enables service provider partners to protect their clients' attack surface by finding every asset in their environment and then proactively prioritizing, automating, and validating the remediation of uncovered exposures and vulnerabilities.

Visibility at every stage of the vulnerability lifecycle
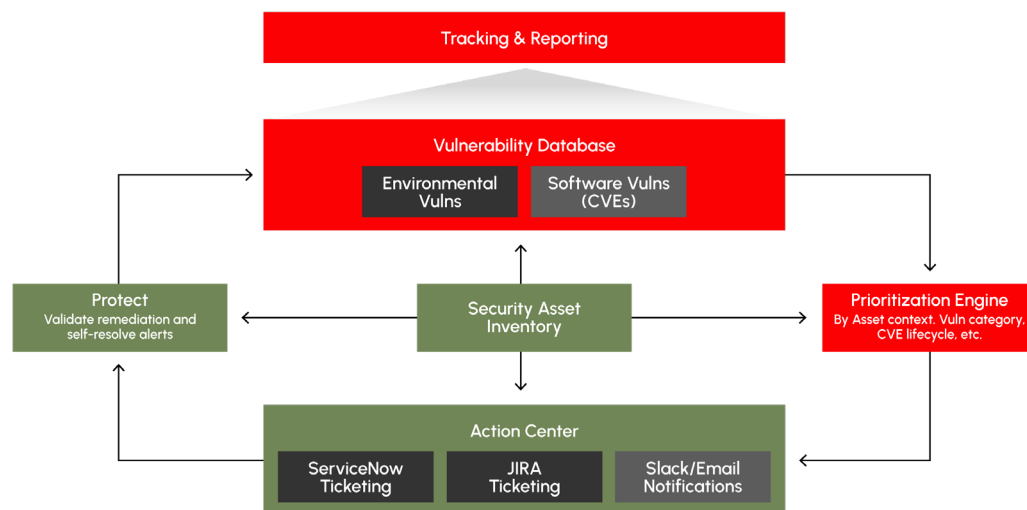

Key Benefits

All vulnerabilities in one place—prioritized with intelligence

- View all classes of vulnerabilities—software and environmental vulnerabilities like missing security controls—in a unified vulnerability inventory
- Prioritize by technical severity and impact to your clients' business
- Enrich CVEs with real-time threat and exploit intelligence from VulnCheck

Automate and validate remediation state

- Automate remediation through outbound integrations to existing tools and processes
- Validate when remediation is observed on the asset
- Uncover incomplete remediation to drive process improvements

Measure and manage risk mitigation performance

- Track metrics like mean time to remediation (MTTR), compliance with remediation SLAs, and patch efficacy
- Drive process maturity by identifying recurring issues
- Gain real-time visibility into the state of your customers' security posture

How Sevco Maximizes Value and Minimizes Risk

Sevco's platform powers full-cycle vulnerability prioritization, remediation validation, and analytics from a single dashboard. Built on the foundation of the industry's first complete asset inventory, the Sevco platform increases your value as a trusted partner and by enabling your customers to reduce risk and gain confidence in their security.

Decreased breach risk

- Surface and prioritize multiple classes of vulnerabilities
- Prioritize risk based on business impact and exploit intelligence provided by VulnCheck
- Ensure controls are deployed as expected
- Find previously unknown devices
- Identify and monitor valuable assets
- Validate remediation efficacy

No unexpected liability

- Validate service levels for all client assets
- Provide cyber insurance readiness for maximizing premium discounts
- Assist in preventing "failure to follow" or negligence claim denials

Higher operational efficiency

- Consolidate multiple classes of vulnerabilities in one dashboard
- Establish a single source of truth for assets
- Enrich and automate existing SOC workflows
- Automate client deployment
- Automate client billing

Increased revenue & profit

- Expect **15-20%** increased in customer revenue; often significantly higher—and the platform pays for itself
- Provide additional services
- Accurate billing

A Frictionless Partner Experience

The Sevco platform was built with service providers in mind. We believe in the value of a partnership and mutual success. We strive to provide a partner program that has little to no overhead, the ability to scale up and down within your managed footprint: a frictionless experience and integration into your existing business models and operations.

Program highlights

- No program or platform fees
- Consumption-based billing
- Volume discounting
- 30-day trial for all your clients

Operational highlights

- Multi-tenancy support
- Self-service provisioning
- Automated client onboarding
- Deploy to hundreds of clients in minutes
- Minimal product training required
- Integrate seamlessly into existing stack
