

CMDB + Sevco Asset Management = A winning integration

Got a complex infrastructure to manage?

That's where CMDBs come in—to give you information on every component in the environment so you can better manage and secure it.

But...to operate optimally, the CMDB must be accurate. Today, that's a big challenge.

Manual effort

27% say

Managing asset inventory takes more time than it should¹

It takes skill to maintain reconciliation rules to make sense of all data sources

Requires expertise

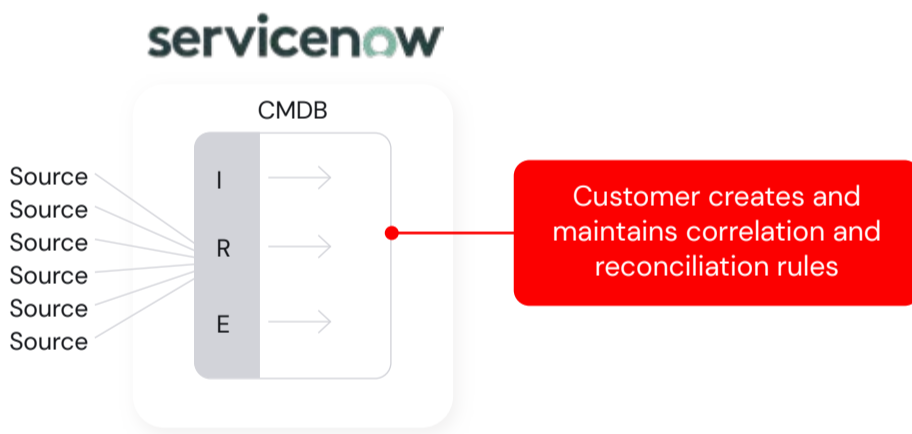

Low confidence

Inaccurate CMDB data reduces trust in the data and IT confidence in decision making

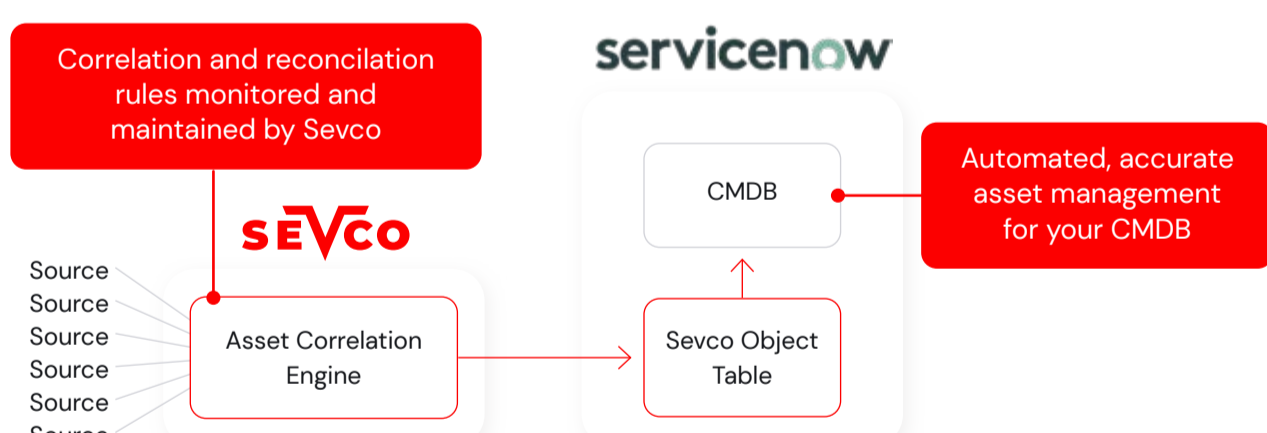

Reimagine your CMDB asset management with Sevco Security

Sevco brings quality and efficiency to your CMDB's asset inventory. The solution aggregates and deduplicates your unique inventory reports to deliver accurate asset intelligence—directly in your CMDB.

Before integrating with Sevco
